

# DOWNLIGHT

## ZOOM F

### Zoom F

A favourite with interior designers. Good with white or copper baffles. Richer Reds make all colours more vibrant and whites a truer white. This helps to enhance interior designer's creation and compliment furnishing choices by showing a full spectrum of colour within fabrics and materials. Uniquely achieves richer reds through a bespoke phosphor LED giving an exceptionally high average colour rendering (CRI : >80/90) and the best red rendering available worldwide . As reds are important in accurate representation of many colours (including true whites) the Origin makes colours look as intended.
